

COMPANY PROFILE

EXPERTECH ENGINEERING®

2025

Looking to build a durable, cost-effective, and customized structure for your business? Expertech Group offers world-class solutions in Pre-Engineered Buildings (PEB), Steel Structures, and Cement Plant Erection, designed to meet your specific needs. Our services include:

- ★ Pre-Engineered Buildings (PEB)
- ★ Steel Structures
- ★ Cement Plant
- ★ And More!

Expertech Engineering was established by Rana Azhar Khan engineer in 2004. He earned a highly reputed name in the veteran engineer's community of Pakistan.

Expertech Engineering" has now entered into its 3rd decade of the construction operations. The legendary contribution of Mr. Rana Azhar Khan in the arena of engineering and construction today sees Expertech Engineering having authority over various innovative and economical building techniques and cherishes successful completion of numerous large industrial, Commercial, Educational Infrastructure and other development projects.

A handwritten signature in black ink that reads "R. Azhar Khan".

Rana Azhar Khan

CEO - Expertech Engineering

A Brief Story About The Company

ABOUT US

“Expertech Engineering” was established in 2004 located in Lahore, Pakistan. This well-equipped facility with modern software’s and machinery is Committed to meet international standards and spreading its wings rapidly.

A Brief Story About The Company

INTRODUCTION

Originally, we were engaged in the field of all kinds of Mechanical, Fabrication Pre Engineering Steel Structure Buildings & Painting in Pakistan.

HISTORY

EXPERTECH ENGINEERING was formed in 2004 by a team of professionals, Qualified Engineers and skilful staff. Today, by the grace of Almighty, our Achievements and services are compared at par with foreign products for meeting the required quality standards.

WORKFORCE

Our workshops, backed by company-trained and experienced engineers, offer a wide repertoire of Erection capabilities to support modern needs at all levels. The staff are individually selected for their professionalism, expertise, and acumen in the particular field. With their respective professional qualifications, licenses, and above all, dedication to the industry, they are our biggest asset.

SCOPE

The quality and reliability engineered into our services can be assessed from the fact that we never rely upon just one specific aspect. Through continuing research and market surveys, our staff keeps itself well-informed and aware of everyday developments in the industry. This enables our engineers to gain a thorough understanding of the respective services.

Different Projects Completed

Our technical team brings expertise in Pre-Engineered Steel Structure Buildings and Cement Plant erection providing top-tier fabrication, sandblasting, and painting solutions.

VISION

To be the industry leader in providing innovative, efficient, and sustainable pre-engineered building solutions that exceed client expectations and set new standards in construction.

MISSION

To deliver high-quality pre-engineered buildings through cutting-edge technology, expert engineering, and sustainable practices, ensuring durability, cost-effectiveness, and timely completion for our clients worldwide.

03

QHSE POLICY

At Expertech Engineering, we are dedicated to providing exceptional services while upholding the highest standards of quality, health, safety, and environmental responsibility. We ensure the health, safety, and well-being of all stakeholders by adhering to strict safety protocols, minimizing our environmental impact, and continuously enhancing our processes. Our commitment is to foster a safe, sustainable, and efficient working environment, ensuring the highest level of service delivery and compliance with industry best practices.

ALL-IN-ONE STRUCTURAL ENGINEERING SOLUTIONS

Expertech Engineering offers comprehensive solutions, handling erection, painting, cleaning, and fabrication with precision. Our expert team ensures efficient, high-quality services that enhance the durability and functionality of your structures, guaranteeing long-term performance and client satisfaction.

Expert Services for Every Stage of Construction

At **Expertech Engineering**, we specialize in the precise erection of a wide range of structures, including pre-engineered buildings, industrial facilities, and commercial complexes. Our experienced team ensures that each project is assembled with the highest standards of safety, accuracy, and efficiency. We take pride in managing every step of the erection process, from initial setup to final inspection, delivering structures that are not only reliable but built to last.

Our painting services provide long-lasting protection and aesthetic enhancement for steel and metal structures. We use high-quality coatings and advanced techniques to protect buildings from environmental factors such as corrosion, moisture, and harsh weather conditions. Whether it's for pre-engineered buildings, bridges, or industrial machinery, our painting solutions are designed to extend the lifespan of your investments while maintaining their visual appeal.

Expertech Engineering offers specialized cleaning services for industrial and commercial structures, ensuring surfaces are free of contaminants that could affect their performance and longevity. Our cleaning services include the removal of rust, old coatings, and surface debris, preparing your structures for further treatments such as painting or protective coatings. This process helps maintain the structural integrity and appearance of your buildings over time, contributing to their long-term durability.

Our fabrication services are at the core of the structures we build. We offer custom fabrication of steel, metal, and other materials to meet the specific needs of each project. From cutting and welding to assembly, our team works with precision to ensure each component is made to exact specifications. We pride ourselves on delivering durable, high-quality materials that are key to the successful construction and performance of your building.

STEEL STRUCTURE

Expertech Engineering is a leading Steel Structure Manufacturing and Construction Company in Pakistan. The Company has Installed Steel Structures For Major Cement, Fertilizer, Automotive, Textile, And Other Industrial And Commercial Complexes in Pakistan. The IMS SYSTEM is employed to keep track of Projects, which further enhances workflow efficiency, workforce safety, and environmental regulation implementation.

Our Expertise in Structural Solutions

At [Expertech Engineering](#), we specialize in providing innovative and reliable structural solutions for a wide range of projects, with a particular focus on erection, painting, and sandblasting services. Our expertise extends to the erection of pre-engineered buildings and commercial structures, ensuring precise assembly and robust foundations. We handle every aspect of the erection process, ensuring the safe and efficient construction of multi-storey buildings, parking plazas, and industrial facilities.

Our team also excels in providing painting services for a variety of structures, applying high-quality coatings that enhance both the durability and aesthetic appeal of steel and concrete surfaces. Whether it's for commercial buildings, bridges, or industrial equipment, our painting services are designed to provide long-lasting protection against corrosion, wear, and environmental factors.

In addition, we offer sandblasting services that prepare and clean surfaces, removing old coatings, rust, and contaminants, ensuring a smooth foundation for subsequent treatments. Our sandblasting services are essential in restoring the integrity of steel structures and enhancing their Durability, especially in harsh industrial environments.

At [Expertech Engineering](#), we are committed to providing high-quality, sustainable, and customized solutions in erection, painting, and sandblasting, ensuring the successful and timely completion of every project with a focus on safety, efficiency, and excellence.

PRE-ENGINEERED BUILDING

At Expertech Engineering, we specialize in the erection, painting, and sandblasting of pre-engineered buildings, ensuring structural integrity, long-lasting durability, and aesthetic appeal. Our expert team delivers efficient, high-quality services that protect and enhance the lifespan of your building. Trust us for precise execution and superior finishes every time.

At **Expertech Engineering**, we offer comprehensive services in the erection, painting, and sandblasting of pre-engineered buildings (PEBs). Our team excels in the precise erection of PEBs, ensuring efficient assembly and structural integrity for a wide range of industrial, commercial, and residential buildings. We handle each phase of the erection process with strict adherence to safety and quality standards, ensuring that your building is completed on time and within budget.

We also provide high-quality painting services, applying durable coatings that not only enhance the aesthetic appeal of the building but also protect the structure from environmental elements and corrosion. Our sandblasting services prepare surfaces by removing rust, old coatings, and other impurities, ensuring a clean and smooth foundation for painting and other treatments. This process extends the lifespan of the building by providing long-lasting protection and maintaining the integrity of the structure.

At **Expertech Engineering**, we are committed to delivering high-quality, efficient, and cost-effective solutions through our erection, painting, and sandblasting services, ensuring your pre-engineered building stands strong and lasts for years to come.

EXPERTECH ENGINEERING: FABRICATION AND ERECTION SERVICES FOR CEMENT INDUSTRY AND MORE

Expertech Engineering has years of experience in providing high-quality fabrication and erection services to the cement industry and other sectors. We focus on delivering practical and innovative solutions to meet our clients' specific needs, ensuring our services are tailored to each project's requirements.

Our team is skilled in handling various fabrication and erection tasks, such as structural steel, custom machinery, piping, and on-site fabrication. We prioritize efficiency, safety, and precision in every project, making sure all work is done with great attention to detail and in line with industry standards.

Our Services Include:

- Electro-mechanical work for Waste Heat Recovery (WHR)
- Cement Line Erection
- Pre-heater Towers
- Conveyor Belts
- Hanging Support Structures
- Seamless Pipe Structures
- Connecting Bridges and Platforms
- Other Miscellaneous Structures (Pipe Racks, Transformer Bodies, Piping Spools, etc.)
- Rotary / Stationary Equipment Installation and Erection

In addition to the cement industry, Expertech Engineering has successfully completed projects in power plants and other industries.

Our goal is to reduce downtime and ensure projects are finished on time. We achieve this by using the right equipment, skilled workers, and thorough follow-up. This method helps us save both time and costs, while maintaining high-quality results.

With the ability to handle projects of all sizes, Expertech Engineering is your trusted partner for all fabrication, erection, and installation needs.

Cement Projects Overview

EXPERTECH ENGINEERING: YOUR TRUSTED PARTNER FOR PRECISION FABRICATION SOLUTIONS

Expertech Engineering offers top-tier fabrication services, specializing in precision and customized solutions. Our expert team ensures that each project meets high standards of quality and durability, with a focus on innovation and sustainability. Whether for industrial, commercial, or structural applications, we provide tailored fabrication that aligns with your specific needs. Trust [Expertech Engineering](#) to bring your ideas to life with reliable, efficient, and eco-friendly solutions.

Pre-Engineered Buildings Structure

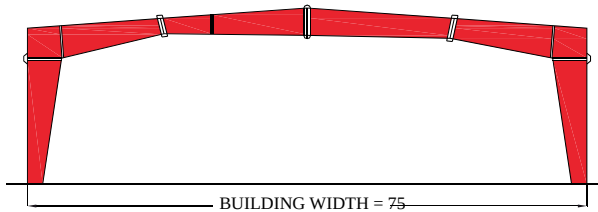

Pre-engineered buildings (PEB), also known as prefabricated steel buildings, are widely used for industrial applications such as factories, warehouses, and hangars. The main advantage of PEBs lies in their flexibility in design, which allows for the optimization of both the building's functionality and aesthetics. With components prefabricated in a controlled factory setting, PEBs are assembled quickly on-site, reducing construction time and costs. Their design can be easily customized to meet the specific needs of the end-user, such as open spaces for warehouses or specialized structural support for factories.

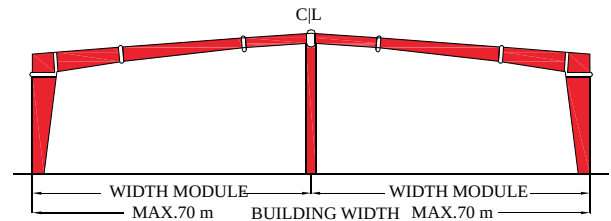

Beyond their structural benefits, PEBs offer a sustainable and cost-effective solution for long-term use. The materials used in PEBs are durable and low-maintenance, while the building's flexibility allows for future expansions or modifications without significant disruptions. These buildings also offer energy efficiency, with insulation options that contribute to reduced operational costs. With their ease of construction, customization options, and long-lasting value, PEBs are an ideal choice for businesses seeking a functional, efficient, and visually appealing building solution.

Why Expertech Engineering

Backed by Industry Experience:

With years of experience in providing advanced structural solutions, Expertech Engineering is committed to delivering innovative and efficient erection services.

Comprehensive Solutions:

We offer one-stop solutions for all your construction needs, from erection and finishing.

Exceptional Customer Support:

Our team ensures excellent customer support, addressing every project detail and keeping clients informed throughout the process.

Transparent Pricing:

At Expertech Engineering, there are no hidden costs—we provide clear and upfront pricing for every project.

Time Efficient:

We deliver time-efficient solutions, ensuring projects are completed on schedule without compromising quality.

Client Inspection:

Clients are encouraged to conduct inspections throughout the project to ensure everything meets their requirements and expectations.

Fastest Delivery:

We pride ourselves on providing the fastest delivery in the industry, ensuring your projects are completed promptly and efficiently.

THANK YOU

We sincerely appreciate your trust in Expertech Engineering. Your decision to partner with us brings us one step closer to achieving excellence in pre-engineered steel structures and construction solutions. We are dedicated to providing you with top-quality services and support every step of the way.

At Expertech Engineering, our team works tirelessly to ensure your project's success. Whether it's innovative design, quality craftsmanship, or on-time delivery, we are committed to exceeding your expectations.

If you have any questions or need further assistance, feel free to reach out to us. We're here to help!

Thank you for choosing us. We look forward to a long-lasting partnership and delivering the best solutions for your engineering needs.

P-71, Al-Karam Housing Society, 40-km Multan Road,
Kalma Chowk By Pass, Manga Mandi, Lahore-Pakistan.
